**security: MAN-IN-THE-MIDDLE ATTACKS**

Did you know that a recent report found that MITM attacks have increased by 35% from 2022 to 2023? Research shows that this number is set to grow exponentially over the coming years.

Join us for a webinar on Man-in-the-Middle (MITM) attacks, a significant cybersecurity threat impacting both individuals and organizations. This session will delve into the intricacies of MITM attacks, their potential repercussions, and actionable steps to safeguard your data and ensure secure communications.

Key Takeaways:

- **Introduction to MITM Attacks:** Gain a clear understanding of MITM attacks and their operational mechanisms.
- **Recognizing the Risks:** Learn to identify common vulnerabilities and detect signs of an ongoing attack.
- **Impact of MITM Attacks:** Explore the serious consequences, including data breaches, financial losses, privacy invasions, and damage to reputation.
- **Real-Life Examples:** Analyze real-world case studies to understand how these attacks are executed.
- **Prevention and Protection:** Discover practical measures and advanced strategies to protect your organization from MITM attacks.

No registration required. [Simply click here to join the meeting.](#) If you'd like to receive a calendar invite, please contact [kelly@pahra.org](mailto:kelly@pahra.org).
